

Book on "Nutrition, Health and Feeding of carps" has been published and released by ICAR-CIFA during the year 2022

About the book

Knowledge about nutrition and feeding of carps has improved during last decade and some of the areas such as methods of improving primary productivity, soil and water quality management, feeding based on nutrient requirement, managing feed scarcity, fish feed processing technology, nano technology, economics of feed management, ornamental carp feeding, advances in nursery, grow out and broodstock nutrition are some of the areas which need more emphasis in the coming years for successful aquaculture. Considering the importance and catering to the needs of researchers, students, farmers and entrepreneurs a book on **Nutrition, Health and Feeding of carps** (ISBN 978-81-954278-2-6) has been edited by **Dr K.C.Das, Dr P. Swain, Dr P. Routray and Dr S.K. Swain**. This book is published by ICAR-Central Institute of Freshwater Aquaculture, Bhubaneswar with funding support from National Fishery Development Board, Hyderabad.

Contents of book

1. Freshwater aquaculture development in India
2. Importance of primary productivity in carp culture
3. Soil and water quality management in freshwater aquaculture ponds
4. Nutrient requirement and feed resources for carp culture
5. Managing feed scarcity for sustainable freshwater aquaculture
6. Fish feed processing technology and quality evaluation
7. Larval nutrition and feeding of nursery carp
8. Carp nutrition and feeding of grow out carp
9. Brood stock diet for quality seed production
10. Ornamental aquaculture and nutrition
11. Nanotechnology in aquaculture nutrition
12. Economics of sustainable feed management in freshwater aquaculture
13. GIFs seed production and role of NFFBB in dissemination of quality seed
